

## Ocean Knotter OK110H

*Ocean Knotter*  
**OK110H**

From a quick glance, many people will wonder what the difference is between this Knotter and our past OK120H? OK 110H is exactly the same size as OK 120H but that's were the resemblance stops. OK 110H has incorporated 120's speedy knot assistance(FG KNOT in 4min) and is now able to be used with thinner diameter lines.(PE#2-#8). 110H also comes stock with our popular knot supporter!

- Large size Tension rubber/ Ring type line holder Thanks to the large size rubber rings and line holders found on our super smooth aluminum brackets, this versatile Knotter will support a wider variety of anglers! From big game freshwater anglers , to the Monster GT hunters!!

We recommend using PE lines from #2~#8. You can use PE line #1 as well, but please be careful not to hurt yourself or damage your line.

- Ring Hook This ring hook will help hold your attachment ring steady while braiding your leader knot.

- Buckle equipped nylon belt. We have changed from Velcro to a buckle on our newest Knotter. This buckle will assure your Knotter stays firmly attached to were you have placed it.
